

Project Overview: Numera AI Assistant

Numera AI is a conversational AI assistant designed to help small business owners and freelancers automate their tax reporting process.

The assistant guides users step-by-step through collecting income and business expenses, optimizing deductions, generating tax reports, providing financial suggestions, and officially submitting tax returns to the authorities.

This project includes:

Market research and competitor analysis

Problem definition and solution strategy

User personas and user journey mapping

Modular prompt engineering structure (System, Interview, Chain prompts)

Full conversation flow and trigger list for smooth module transitions

The main goal of Numera AI is to make tax filing easy, clear, and fully automated, minimizing user stress and maximizing financial accuracy.
